

This Article Information Sheet (AIS) provides relevant battery information to retailers, consumers, OEMs and others users requesting a GHS-compliant SDS. Articles, such as batteries, are exempt from GHS SDS classification criteria. The GHS criteria is not designed or intended to be used to classify the physical, health and environmental hazards of an article. Branded consumer batteries are defined as electro-technical devices. The design, safety, manufacture, and qualification of branded consumer batteries follow ANSI and IEC battery standards. This document is based on principles set forth in the following hazard communication approaches: ANSI Z-400.1, GHS, JAMP AIS, and IEC 62474.

1. Document Information	
Document Name	Duracell Alkaline Batteries (Major and Specialty Cells)
Document ID	AIS-ALK
Issue Date	1-May-15
Version	2
Preparer	Global Product Stewardship
Last Revision	1/7/2016
Information Contact	moquet.l@duracell.com
2. Company Information	
Name & Address	Duracell Global Business Unit, 14 Research Drive, Bethel, CT USA 06801
Telephone	(203) 796- 4430
Website	www.duracell. com
Consumer Relations	North America: 1-800-551-2355 (9:00 AM - 5:00 PM EST)
3. Article Information	
Description	Duracell branded consumer alkaline battery
Product Category	Electro-technical device
Use	Portable power source for electronic devices
Global sub-brands (Retail)	Coppertop, Plus, Quantum, Simply, Turbo, Ultra, Basic, TurboMax
Global sub-brands (B2B)	Procell, Industrial, OEM/OEA
Sizes	Major Cells: AA,AAA, C, D & 9V
Sizes	Specialty Cells: AAAA, MN11. MN21, MN27, MN175, PX76 (LR44), PX28, PX625, (LR09),
	LR43, LR54, N, J, 4.5V, 625A
Sizes	<u>Lanterns</u> : MN903, MN908, MN915, MN918; MN1203
Principles of Operation	A battery powers a device by converting stored chemical energy into electrical energy.
Representative Product Images	DURACELL DURACELL DURACELL DURACELL DURACELL DURACELL DURACELL DURACELL DURACELL DURACELL DURACELL
	Major Cells Lantern Specialty
4. Article Construction	
Applicable Battery Industry Standards	ANSI C18.1M Part 1, ANSI C18.1M Part 2, ANSI C18.4, IEC 60086-1, IEC 60086-2, IEC 60086-5
Electro-technical System	Alkaline Manganese Dioxide
Electrode - Negative	Zinc (CAS # 7440-66-6)
Electrode - Positive	Manganese Dioxide (CAS # 1313-13-9)
Electrolyte	Alkali Metal Hydroxide (aqueous potassium hydroxide - CAS # 1310-58-3)
Materials of Construction - Can	Nickel Plated Steel
Declarable Substances	None
(IEC 62474 Criteria 1)	
Mercury Free Battery	Yes
(ANSI C18.4M <5ppm)	
Small Cell or Battery	Sizes: AAA and Specialty Cells fit inside a specially designed test cylinder 2.25 inches
(ANSI C18.1M Part 2; IEC 60086-5)	(57.1mm) long by 1.25 inches (31.70 mm) wide.

AIS-ALK 1 of 4

5. Health & Safety	
Ingestion/Small Parts Warning	Required for Small Cell or Battery (Sizes: AAA and Specialty Cells): Keep away from
ingestion/smail Parts Warning	
Normal Conditions of Use	children. If swallowed, consult a physician immediately.  Exposure to contents inside the sealed battery will not occur unless the battery leaks, is
	exposed to high temperatures, or is mechanically abused.
Note to Physician	A damaged battery will release concentrated and caustic potassium hydroxide.
First Aid - If swallowed	Do not induce vomiting. Seek medical attention immediately. USA CALLS ONLY - CALL 24-
Thistylia ii shahonca	HOUR NATIONAL BATTERY INGESTION HOTLINE: (202) 625-3333 - COLLECT.
First Aid - Eye Contact	Flush with water for at least 15 minutes. Seek medical care if irritation persists.
First Aid - Skin Contact	Remove contaminated clothing. Wash skin with soap and water. Seek medical care if
	irritation persists.
First Aid - Inhalation	Remove to fresh air.
Battery Safety Standards & Testing	Duracell batteries meet the requirements of ANSI C18. 1M Part 2 and IEC 60086-5. These
	standards specify tests and requirements for alkaline batteries to ensure safe operation under normal use and reasonably foreseeable misuse. The test regimes assess three
	conditions of safety. These are:
	<u>1-Intended use simulation:</u> Partial use, vibration, thermal shock, and mechanical shock
	<b>2-Reasonably foreseeable misuse:</b> Incorrect installation, external short-circuit, free fall
	(user-drop), over-discharge, and crush
	3-Design consideration: Thermal abuse, mold stress
Precautionary Statements	<b>CAUTION:</b> Batteries may explode or leak, and cause burn injury, if recharged, disposed of
	in fire, mixed with a different battery type, inserted backwards or disassembled. Replace
	all used batteries at the same time. Do not carry batteries loose in your pocket or purse.
	Do not remove the battery label. Keep small batteries (i.e., AAA) away from children. If
	swallowed, consult a physician at once.
6. Fire Hazard & Firefighting	
Fire Hazard	Batteries may rupture or leak if involved in a fire.
Extinguishing Media	Use any extinguishing media appropriate for the surrounding area.
Fires Involving Large Quantities of	Large quantities of batteries involved in a fire will rupture and release caustic potassium
Batteries	hydroxide. Firefighters should wear self-contained breathing apparatus and protective
	clothing.
7. Handling & Storage	
Handling Precautions	Avoid mechanical and electrical abuse. Do not short circuit or install incorrectly. Batteries
	may rupture or vent if disassembled, crushed, recharged or exposed to high
	temperatures. Install batteries in accordance with equipment instructions.
Storage Precautions	Store batteries in a dry place at normal room temperature. Refrigeration does not make
	them last longer.
Spills of Large Quantities of Loose	Notify spill personnel of large spills. Irritating and flammable vapors may be released from
Batteries (unpackaged)	leaking or ruptured batteries. Spread batteries apart to stop shorting. Eliminate all
	ignition sources. Evacuate area and allow vapors to dissipate. Clean-up personnel should
	wear appropriate PPE to avoid eye and skin contact and inhalation of vapors or fumes.
	Increase ventilation. Carefully collect batteries and place in appropriate container for
	disposal. Remove any spilled liquid with absorbent material and contain for disposal.
O. Discoursed Constitutions (CUS Cons	2 421
8. Disposal Considerations (GHS Section 1)	
Collection & Proper Disposal	Dispose of used (or excess) batteries in compliance with federal, state/provincial and
	local regulations. Do not accumulate large quantities of used batteries for disposal as
	accumulations could cause batteries to short-circuit. Do not incinerate. In countries,
	such as Canada and the EU, where there are regulations for the collection and recycling of
	batteries, consumers should dispose of their used batteries into the collection network at
	municipal depots and retailers. They should not dispose of batteries with household
	trash.

AIS-ALK 2 of 4

USA EPA RCRA (40 CFR 261)	Classified as non-hazardous waste (not ignitable, corrosive, reactive or toxic). Federal Universal Waste Regulations (40 CFR 273) do not apply. State requirements may be more stringent than Federal.
California Universal Waste Rule (Cal. Code Regs. Title 22, Div. 4.5, Ch. 23)	California prohibits disposal of batteries as trash (including household trash).
9. Transport Information (GHS Section	1 14)
Regulatory Status	Not regulated. Alkaline batteries (sometimes referred to as "Dry Cell" or "household" batteries) are not listed or regulated as dangerous goods under IATA Dangerous Goods Regulations, ICAO Technical Instructions, IMDG Code, UN Model Regulations, U.S. Hazardous Materials Regulations (49 CFR), and UNECE ADR.
UN Identification Number/ Shipping Name	None - Not Required
Special Provision (SP) Conformance	Special regulatory provisions require batteries to be packaged in a manner that prevents the generation of a dangerous quantity of heat and short circuits. Shippers can prepare batteries by taping the terminals, individually packaging batteries, or otherwise segregating the batteries to prevent risk of creating a short circuit. Batteries shipped in original unopened Duracell packaging is compliant.
US DOT SP	49 CFR 172.102 Special Provision 130
Air Transport (IATA/ICAO) SP	Special Provision A123 (57th Edition - 2016). NOTE: The words "NOT RESTRICTED" and "SPECIAL PROVISION A123" must be included on the description of the substance on the Air Waybill, when air way-bill is issued.
Passenger Air Travel	No restrictions

11b. AIS Hazard Communication Approaches (consulted in developing this document):		
Globally Harmonized System (GHS)	GHS SDS requirements and classification criteria do not apply to articles or products (such	
	as batteries) that have a fixed shape, which are not intended to release a chemical. The	
	article exemption is found in Section 1.3.2.1.1 of the GHS and reads: <i>The GHS applies to</i>	
	pure substances and their dilute solutions and to mixtures. "Articles" as defined by the	
	Hazard Communication Standard (29 CFR 1900.1200) of the OSHA of the USA, or by	
	similar definition, are outside the scope of the system."	
Joint Article Management Promotion	JAMP is a Japanese Industry Association who developed the concept of an Article	
Consortium JAMP	Information Sheet as a supply chain tool to share and communicate chemical information	
	in articles. The AIS authoring process is based on "declarable" substances to meet global	
	regulatory requirements as well as substances to be reported by GADSL, JIG, etc.	
	regulatory requirements as well as substances to be reported by Gribbly ster.	
IEC 62474 Ed. 1.0 B:2012 Material Declaration for Products of and for	An international standard that came into effect in March 2012 concerning declaration for electrical and electronic products. IEC 6274 replaces the defunct Joint Industry Guide –	
the Electro-technical Industry	Material Declaration for Electro-technical Products (JIG-101-Ed 4.1 (May 21, 2012)	
the Electro-technical moustry	invalental Decid attornor Electro-technical Products (310-101-Lu 4.1 (May 21, 2012)	
IEC 62474 Database - Publically	The general principle for a substance to be included in the database as a declarable	
-	substance is: 1) existing national laws or regulations in an IEC member country that are	
Environmental Standardization for	relevant to Electro-technical products and that prohibit or restrict substances, or that	
electrical and electronic products and	have a labeling, communication, reporting or notification requirement, and 2) applying	
systems.	IEC 62474 criteria results in identification of declarable substance.	
ANSI Z 400.1/Z19.1 (2010)	2.1 Scope: Applies to preparation of SDSs for hazardous chemicals used under	
	occupational conditions. Does not address how the standard may be applied to articles.	
	It presents basic information on how to develop and write a SDS. Additional information	
	is provided to help comply with state and federal environmental and safety laws and	
	regulations. Elements of the standard may be acceptable for International use.	
DISCI AIMER: This AIS is intended to n	rovide a brief summary of our knowledge and guidance regarding the use of this	
	here has been compiled from sources considered by Duracell to be dependable and is	
	s knowledge. It is not meant to be an all-inclusive document on worldwide hazard
